

MARK WILSON
34 EDGEWATER DR.
905-9858

Project Narrative:

☐ Build a 14' X 16' storage building / Garage. (1' overage for overhang and foundation)

☐ Positioned as shown by blue square on map.

- Set backs are -- 40'+ East to Edgewater Drive (Front)
- 30'+ South to property line (Side)
- ~~26~~ 26' North to property line (Side)* Request Variance
- 30'+ West to house / water protection line

My positioning priorities are:

- Minimal to no change to community appearance
- Farthest practical set back to water protection line
- Maintain present paved driveway structure.

☐ Structure will have a single overhead door (facing the house / south-west) with a sloping roof approximately 10' high in front to approximately 8' back, built structurally to state and town code. The siding and color will approximate and match the existing house.
